Dr. Rasha Abdeldayem
UAE

Pr. Arnaud Wattiez
France

COURSE DESCRIPTION:

This course will provide an extensive knowledge of combined office and operative hysteroscopy program.

The aim of the course is to define the main theoretical and practical issues to perform Hysteroscopic procedures safely and effectively, with instrumentations and to improve one's skills. It will mainly focus on the rationale for office surgery, showing tips and tricks to switch operative hysteroscopy from operating room to office setting.

The course will consist of specific lectures by international experts in ambulatory Gynecology, about current technologies, evidence-based guidelines, and protocols for a correct management of the patient; then hands-on workshop and live surgery will be performed to demonstrate the application of the concepts. Adequate time for interactivity will be allowed to gain the most from the program.

With a strong focus on execution and hands-on sessions, this course will allow you to take your practice to the next level.

Why Attend?

The course will give you the unique opportunity for a full immersion in the world of Hysteroscopy with the two pioneers and experts of this techniques.

Results:

at the end of the class, participants will learn how to manage operative and office hysteroscopic procedures in OR and how to switch some of them in office-setting, with innovative techniques and instrumentations.
